The purpose of this modification is to definitize the contractor's proposal dated November 12, 1999. The results of this modification is an increase in the estimated cost of the contract of \$12,415,229 with an increase in the potential award fee of \$743,272, which incorporates revisions to the scope of work, as further defined below, and in enclosure 1 to this modification, attached.

- A. Increased work on definition and analysis of interfaces with external entities; JSC, KSC, GRC, ESA, Russia, Italy and Japan.
- B. Expanded reliance on the Web for ISS payload data and voice communication and corresponding increase in work or security.

This modification also authorizes the acquisition of equipment and recognizes overrun costs as non-fee bearing costs.

In addition, due to an administrative error, page 1 block 14 on modifications 47 through 49 are corrected to reflect potential award fee as \$1,172,441.

1. The following Article to the contract is updated to reflect negotiations:

Additional in-scope work for Option Year 1
August 1999 – August 2000**

The following paragraphs are incorporated into Section J-1 Statement of Work of contract NAS8-44000.

1. Increased work on definition and analysis of interfaces with external entities; JSC, KSC, GRC, ESA, Russia, Italy, Japan. The increased interest in remote operations and changes in the ISS flight systems have resulted in additional work for the UMS contractor.
2. Expanded reliance on the Web for ISS payload data and voice communication and corresponding increase in work on security. Responding to the growth of technology, which generally reduces costs, has resulted in additional work for the UMS contractor.

These additional in-scope requirements particularly affected the contractor's effort under SOW Task 1, Systems Engineering and Task 2, Design and Development, with some impact on Task 5, Verification.

ATTACHMENT J-6

SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS SUBCONTRACTING PLAN

1.0 INTRODUCTION

Lockheed Martin is dedicated to increasing subcontracting opportunities for small business and small, disadvantaged business (SB/SDBs). Our SB/SDB subcontracting plan satisfies the requirement of Public Law 95-507, as implemented by the Office of Federal Procurement Policy (OFPP) Letter 80-2, Federal Acquisition Regulation (FAR) Part 19.704, FAR clause 52.219-9, and NASA FAR Supplemental clause 18-52.219-73. The term "SDB" includes woman-owned businesses.

2.0 GOALS IN TERMS OF DOLLARS AND PERCENTAGES (FAR 52.219-9(D)(1) AND (2))

Lockheed Martin's goal for SB/SDB subcontracting is to award 35% or more of the total estimated contract value to small businesses, of which, at least 15% of the total estimated contract value will be awarded to SDBs. These percentages amount to the following for each contract period:

	SB	SDB
Three Year Base Period	\$33.5M	\$14.3M
Option Year One	\$10.9M	\$ 4.7M
Option Year Two	\$ 5.8M	\$ 2.5M

3.0 PRINCIPAL TYPES OF SUPPLIES AND SERVICES (FAR 52.219-9(D)(3))

NTI, a small, woman-owned business (SDB) located in Huntsville, AL, has principal responsibility for EHS development, and operations and maintenance. bd Systems, a small disadvantaged business (SDB), also located in Huntsville, will perform hardware/software verification and acceptance testing for upgrades and new systems. Further, we will use subcontracts for services, equipment and materials, as well as utilize other direct and indirect subcontracting opportunities, to meet NASA's SB/SDB goals. These other opportunities include, when appropriate, security services, travel management, support services and facility utilization. The Mission Suitability volume describes in greater detail the effort hereunder which Lockheed Martin has assigned to NTI and bd Systems.

4.0 METHODS USED TO DEVELOP GOALS (FAR 52.219-9.(D)(40))

The challenging SB/SDB goals set by the Government made clear that a substantial portion of the work to be performed had to be done by SB/SDB team member/subcontractors. We realized that subcontracting equipment, materials and services alone could not meet the RFP requirement.

5.0 METHODS USED TO IDENTIFY POTENTIAL SOURCES (FAR 52.219-9(D)(5))

Lockheed Martin's structured process for selecting subcontractor team members is quite flexible, and is driven by the nature of the customer's requirements and the culture of the project's environment. For this project, Lockheed Martin sought the counsel of the customer and other knowledgeable sources in the MSFC-Huntsville environs. Lockheed Martin did an intensive analysis of the competitive field, including an assessment of the caliber and qualifications of potential SB/SDB partners currently performing as MSFC prime subcontracts. After evaluation of the capability, project incumbency and performance record of the most attractive such companies, it became clear that NTI, of Huntsville, AL, had no equal as a prospective subcontractor/partner for the UMS project.

NTI, as the well-regarded, high-performing incumbent for a very large portion of the present UMS work, had no peer as a potential partner. Discussions at the highest levels of Lockheed Martin and NTI lead to a conclusion that the company cultures and capabilities matched well, for purposes of performing the UMS project. Thus, NASA is assured of the dedication of the Lockheed Martin/NTI team to perform this project to the highest satisfaction of the customer. NTI's incumbency in EHS development, mission planning and operations, and maintenance support gives NASA assurance of risk-free mission/flight support during transition. This is a critical capability held only by the Lockheed Martin/NTI team.

By a similar process of reviewing the capability of SDBs in the Huntsville, AL area, we concluded that bd Systems, Inc., could fill a niche role in our program. They principally will be responsible for hardware/software verification and testing. Other support effort may be performed, if assigned.

6.0 OTHER-THAN-DIRECT COSTS (FAR 52.219-9(D)(6))

Indirect costs are included in our goals for this project. Our travel management, facilities leases and management, security, logistics, technical publications and other administrative support which will be provided through indirect cost pools and "other than direct" cost redistribution, will be performed to the greatest extent possible by SB/SDBs. These costs will be included in our SB/SDB subcontract awards data delivered in accordance with the terms of the prime contract.

7.0 PLAN ADMINISTRATION (FAR 52.219-9(D)(7))

This SB/SDB Plan will be administered by the Lockheed Martin UMS Business Operations manager, whose duties are to:

- Develop and maintain bidders' lists of SB/SDB concerns from all possible sources
- Ensure the procurement packages are structured to permit SB/SDB concerns to participate to the maximum extent possible
- Encourage the inclusion of SB/SDB concerns in all solicitations for products or services which they are capable of providing
- Ensure periodic rotation of potential subcontractors on bidders lists
- Ensure the establishment and maintenance of records of solicitations and subcontract award activity

- Attend or arrange for attendance of company counselors at business opportunity workshops, minority business enterprise seminars, trade fairs, etc., as appropriate
- Monitor attainment of proposed goals
- Prepare and submit periodic subcontracting reports when requested
- Participate as appropriate during the conduct of compliance reviews by Federal agencies
- Closely monitor costs incurred by principal SB and SDB team member/subcontractors

8.0 EFFORTS TO ASSURE EQUITABLE OPPORTUNITIES (FAR 52.219-9(D)(8))

Lockheed Martin will develop source lists of capable, experienced SB/SDB suppliers and subcontractors for providing equipment, materials and services. We will also utilize the resources of the MSFC Small Business Office, Small Business Administration, trade publications, local area business associations and minority networks to augment our own source list. Outreach activities will be conducted to acquaint local SB/SDB contractors with opportunities available in the UMS project, and acquire capability/performance information from these candidates. Procurements will be structured to assure SB/SDBs have equitable opportunities to compete.

As necessary, SB/SDB databases available in other parts of the Lockheed Martin Company will be utilized. Lockheed Martin's UMS technical and business personnel will be continually made aware of SB/SDB goals, and progress in meeting them.

9.0 SUBCONTRACTING REQUIREMENTS (FAR 52.219-9(D)(7))

The clause entitled "Utilization of Small Business Concerns and Small Disadvantaged Business Concerns" will be included in all subcontracts which have subcontracting opportunities. All subcontractors receiving subcontracts valued in excess of \$500,000 will be required to comply with a subcontracting plan similar to this one. Additionally, all subcontracts, regardless of dollar value, which appear to have subcontracting opportunities, will include a requirement for the reporting of second-tier SB/SDB awards.

10.0 COOPERATION AND REPORTING (FAR 52.219-9(D)(10))

Lockheed Martin is currently reporting on SB/SDB performance-toward-goals on all major contracts presently being performed. Lockheed is well versed and experienced in the preparation and submission of Standard Forms 294 and 295. Additionally, the NASA contracting officer will receive semi-annual reports of company progress toward meeting the SB/SDB goals contained in the contract. Further, Lockheed will assure that appropriate reporting required by FAR 52-219-9 (d)(9), above, will be performed by subcontractors. Lockheed Martin also agrees to cooperate fully in any studies or surveys the Government may request.

11.0 TYPES OF RECORDS (FAR 52.219-9(D)(11))

Lockheed will maintain at least the following types of records to document compliance with our subcontracting plan:

- SB/SDB source lists, vendor guides, and other documentation which identifies such companies
- Organizations we network with in locating sources

- Contract files on each award over \$100,000, which documents whether SB/SDBs were considered and why receives the evaluation and selection process
- Records of outreach activities with trade associations, business development organizations, and records of participation in trade fairs, conferences and symposia
- Records of internal activities to guide and encourage technical and procurement personnel through workshops, training and seminars
- Records will be kept indicating subcontractor names, addresses and business size.

12.0 IMPLEMENTATION

In order to effectively implement this plan to the extent consistent with efficient contract performance, we will perform the following functions:

- Assist small business and small disadvantaged business concerns by arranging solicitation time for the preparation of bids. Quantities, specifications, and delivery schedules to facilitate the participation by such concerns. Where the list of potential small business disadvantaged business subcontractors is excessively long, reasonable effort will be made to give all such small business concerns an opportunity to compete over a period of time
- Provide adequate and timely considerations of the potential of small business and small disadvantaged business concerns in all "make-or-buy" decisions
- Counsel and discuss subcontracting opportunities with representatives of SB/SDB firms.
